

GENERAL FEATURES

Icaro's ST16 stirrup bender machines are designed with maximum attention to detail in order to guarantee high-speed production of stirrups of different sizes.

Our machines, which are all equipped with a manual electrical panel, can be either single phase or three phase. This is a compact machine that comes with four removable legs, allowing for fast and easy transportation. Users will find it particularly easy to operate, thanks to a handy tool tray, fitted on every piece.

| MODEL | rpm (50Hz) | (50Hz) kW/HP | (60Hz) kW/HP | 65KG/mm x1Ø x2Ø x3Ø | 85KG/mm x1Ø x2Ø x3Ø | Kg | Kg | CM |
|-------|----------------|---------------------|---------------------|------------------------|------------------------|--------|--------|----------|
| ST16 | 21 | 1,5/2 | CUSTOM | 16 - 12 - 10 | 14 - 10 - 8 | 175 | 1 | 80x70x96 |

TECHNICAL FEATURES

• Our stirrup benders machines follow all CE standard European laws as well as worldwide regulations. The quality control procedures performed on our machines abide by ISO9001/2008 norms.

• Every machine comes with a stirrup tool so as to measure each side of the stirrup with the utmost precision.

• Four removable legs allow for great practicality and reduced use of space.
